PREFACE

The present is the Twenty-first Annual Report on Vital Statistics to be issued by the Dominion Bureau of Statistics on data obtained under arrangement with Provincial Registration Departments. It is the sixteenth report covering all provinces.

The First, Second and Third Annual Reports contain a full account of the origin and purpose of the agreement between the Dominion and the provinces for the production of vital statistics, together with a sketch of the earlier development of these statistics in Canada. Registration of births, deaths and marriages is carried out by the provincial authorities, each province having passed an act making registration compulsory and prescribing that certain items of information be obtained on a uniform basis. Transcripts of the certificates are forwarded to the Dominion Bureau of Statistics and from these the Annual Reports for Canada are compiled. For the year 1941, in addition to the preparation of tables for the present volume, the Bureau of Statistics issued quarterly reports and a preliminary annual report, and supplied to all provinces the compilations required for their respective reports.

As in past years, the statistics of births, deaths and marriages among the Indian population of the provinces are included in the present report. They are also given separately in Appendix I. A summary of the vital statistics of Yukon and the Northwest Territories forms Appendix II.

The tables dealing with deaths by cause have been compiled in accordance with the Fifth Decennial Revision recommended by the International Commission for classification of Diseases and Causes of Death, at Paris, France, in October, 1938. Appendix III shows the relationship between the Intermediate International List of Causes of Death used in certain tables and the Detailed International List used in others. Appendix IV lists by provinces the number of deaths from all causes and from certain important causes according to the presence or absence of medical attendance. Appendix V presents the number of cases of certain notifiable diseases reported in the provinces of Canada during each month of 1941.

The present volume is issued without text, in this manner resembling previous Annual Reports commencing with the Ninth. In order, however, that the most essential figures for rates and comparisons in time shall be available to the reader, twenty-six tables containing such figures have been included in the report. They comprise the first section, under the title "Comparative and Analytical Tables".

The collection of the data and the preparation of the Report were under the direction of J. T. Marshall, Chief of Vital Statistics.

S. A. CUDMORE,
Dominion Statistician.

PRÉFACE

Le présent rapport annuel sur les Statistiques Vitales du Canada est le vingt et unième de la série que publie le Bureau Fédéral de la Statistique sur les données obtenues en vertu d'ententes avec les départements provinciaux. C'est le seizième rapport couvrant toutes les provinces du Canada.

Le premier, le deuxième et le troisième rapports annuels donnent un aperçu complet de l'origine et du but de cette entente entre le Dominion et les provinces pour la compilation des statistiques vitales et décrivent les progrès de ces statistiques au Canada. L'enregistrement des naissances, décès et mariages est fait par les autorités provinciales, chaque province ayant décrété l'enregistrement obligatoire suivant des formules tendant à établir certaines informations sur des bases uniformes. Des copies des ces actes sont envoyées au Bureau Fédéral de la Statistique et leur compilation sert de base au rapport annuel. En 1941, le Bureau Fédéral de la Statistique, outre la préparation de ces tableaux, a publié des bulletins trimestriels et un rapport annuel préliminaire. Il a de plus fourni à toutes les provinces les compilations dont elles avaient besoin pour leurs rapports respectifs.

Comme par le passé, on a fait entrer dans ce rapport les naissances, décès et mariages de la population indienne des provinces. Ils sont aussi donnés séparément dans l'appendice I. Un résumé des statistiques vitales du Yukon et des Territoires du Nord-Ouest forme l'appendice II.

Les tableaux portant sur les décès selon la cause ont été dressés conformément à la cinquième revision décennale faite à Paris, France, en octobre 1938 et recommandée par la Commission Internationale pour la Classification des Décès et des Causes de Décès. L'appendice III montre la relation entre la liste internationale intermédiaire des causes de décès suivie dans certains tableaux et la liste internationale détaillée suivie dans d'autres. L'appendice IV donne par province le nombre de décès par toutes causes et par certaines causes importantes, avec ou sans l'assistance médicale. L'appendice V représente le nombre de cas de certaines maladies déclarables constatés dans les provinces canadiennes, chaque mois de 1941.

Le présent volume ne contient pas de texte, étant ainsi similaire aux rapports annuels antérieurs, commençant avec le neuvième rapport. Cependant, pour que le lecteur ait toujours les chiffres les plus essentiels des taux et des comparaisons de temps ces chiffres ont été incorporés en vingt-six tableaux formant la première section et appelés "Tableaux comparatifs et analytiques".

Le recueil des données ainsi que la préparation du présent rapport ont été faits sous la direction de J. T. Marshall, chef des statistiques vitales.

La traduction a été faite par la Branche de Traduction du Bureau: Omer Chaput, chef.

S. A. CUDMORE,
Statisticien du Dominion.

COMPARATIVE AND ANALYTICAL TABLES

TABLEAUX COMPARATIFS ET ANALYTIQUES

NOTES

Yukon and the Northwest Territories with a population of 16,942 in 1941 are not included in the tables. Tables of births, deaths and marriages for these Territories are however given in Appendix II.

Figures for Registration Area as of 1921 or for Canada for the years 1921-25 inclusive comprise all the provinces except Quebec, which province entered the Registration Area in 1926.

Populations for 1921, 1931 and 1941 are census figures, those for Manitoba, Saskatchewan and Alberta for 1926 and 1936 are based on the census of the Prairie Provinces and remaining figures are estimates to the nearest thousand.

Rates have been standardized on the standard million of England and Wales, 1901.

Divisions in British Columbia are census divisions and the correspondence of their subdivisions with those in Census publications is as follows: $5_A = 5a$, b, c, d; $5_B = 5e$, f; $6_A = 6a$, b, c; $6_B = 6d$, e, f; $8_A = 8a$, b, c, d; $8_B = 8e$, f, g; $9_A = 9a$; $9_B = 9b$; $9_C = 9c$, d, e; $9_D = 9f$; $10_A = 10a$; $10_B = 10b$; $10_C = 10c$, d.

"Urban" includes cities, towns and villages of 1,000 population and over, "Rural" the remaining parts. The classification of cities, towns and villages is according to the Census of 1941.

It should be noted that there is some variation in the comparison factor between figures for the years 1939 and 1940 and the figures for 1941 due to the disturbance in distribution caused by changes in class and re-arrangement of titles recommended in the Fifth Revision of the International List of Causes of Death. Adjustments have been made to correct the demographic error as closely as possible.

Le Yukon et les Territoires du Nord-Ouest, dont la population s'élevait à 16,942 en 1941, sont exclus de ces tableaux. Les tableaux des naissances, des décès et des mariages pour ces territoires sont donnés dans l'appendice II.

Les chiffres du territoire d'enregistrement en 1921, ou pour le Canada les années 1921-25 inclusivement comprennent toutes les provinces sauf le Québec; cette province est entrée dans le territoire d'enregistrement en 1926.

Les chiffres de la population en 1921, 1931 et 1941 sont ceux du recensement; la population du Manitoba, de la Saskatchewan et de l'Alberta est celle du recensement des Provinces des Prairies de 1926 et 1936; les autres chiffres sont des estimations au millier le plus près.

Les taux ont été standardisés sur le million standard d'Angleterre et du Pays de Galles, 1901.

Les divisions en Colombie Britannique sont les divisions de recensement et leurs subdivisions correspondent comme suit aux subdivisions figurant dans les publications du recensement: $5_A = 5a$, b, c, d; $5_B = 5e$, f; $6_A = 6a$, b, c; $6_B = 6d$, e, f; $8_A = 8a$, b, c, d; $8_B = 8e$, f, g; $9_A = 9a$; $9_B = 9b$; $9_C = 9c$, d, e; $9_D = 9f$; $10_A = 10a$; $10_B = 10b$; $10_C = 10c$, d.

"Urbains" comprend cités, villes et villages ayant une population de 1,000 âmes et au-dessus, le reste est inclus avec "Ruraux". La classification des cités, villes et villages est selon le recensement de 1941.

A noter qu'il y a une certaine variation dans le facteur de comparaison entre les chiffres des années 1939 et 1940 et ceux de 1941. Cette variation est due au remaniement de la distribution nécessité par les changements dans les catégories et le réarrangement des titres recommandés dans la Cinquième Revision de la Liste Internationale des Causes de Décès. Les ajustements ont été faits de façon à corriger le plus possible l'erreur démographique.

(1) The standardized death rates for Canada by provinces for the years 1932-40 inclusive are being revised. Final results are dependent upon the receipt of detailed information from the Census of 1941 concerning inter-provincial migration which is not available. Les taux de décès uniformisés par province, pour le Canada, années 1932-40, sont présentement revisés. Les résultats définitifs reposeront sur les renseignements détaillés du recensement de 1941, sur la migration interprovinciale et qui ne sont pas encore connus.

APPENDIX I

BIRTHS AND DEATHS AMONGST THE INDIAN POPULATION

APPENDICE I

NAISSANCES ET DÉCÈS DE LA POPULATION INDIENNE

APPENDIX I

BIRTHS AND DEATHS AMONGST THE INDIAN POPULATION

The totals of births, deaths and marriages presented in the general tables of the present report include returns for Indians, resembling in this respect the corresponding tables of previous reports. The births and deaths of Indians in Canada form only an inconsiderable portion of the whole but this is not so true of certain provinces considered individually. Moreover, in particular aspects of Vital Statistics, e.g., deaths from tuberculosis, the figures for Indians assume an importance beyond the numerical proportion of this class in the population. In the present volume, therefore, as in several previous, it has been thought well to supplement the general tables with an appendix containing the salient features of births and deaths of Indians. Not only will these tabulations enable a special study of the vital statistics of the Indian population, but they will also place the reader in a position to eliminate from the general tables the influence of Indian births or deaths.

Indian marriages cannot be separately tabulated since the racial origin of bride and groom is not given on the marriage certificate.

The term "Indian" as used in these tables includes half-breeds, whenever the statement of racial origin on the birth or death certificate allows their recognition.

The statistics for Indians cannot be considered as having the same degree of completeness as those for the white population. With regard to the accuracy of particular phases of the statistics such as ages, it is probable that in many cases the knowledge of the informants is vague. As to reported causes of death, a large proportion of these are from others than physicians.

APPENDICE I

NAISSANCES ET DÉCÈS DE LA POPULATION INDIENNE

Les totaux des naissances, décès et mariages dans les tableaux d'ensemble du présent rapport comprennent ceux des Indiens, comme dans les tableaux correspondants des rapports antérieurs. Les naissances et décès d'Indiens au Canada ne forment qu'une portion minime du total, mais il n'en est pas ainsi quand chaque province est considérée séparément. De plus, sous certains aspects des statistiques vitales, comme dans les décès causés par la tuberculose, les chiffres des Indiens prennent une importance dépassant la proportion numérique de cette classe dans la population. Dans le présent volume, il a été jugé opportun, comme dans les derniers rapports, d'ajouter aux tableaux d'ensemble de ce volume un appendice contenant les données principales sur les naissances et les décès d'Indiens. Non seulement ces tableaux permettent de faire une étude spéciale des statistiques vitales de la population indienne, mais ils mettent aussi le lecteur en état d'écarter des tableaux d'ensemble, l'influence que peuvent avoir les naissances et décès d'Indiens.

Il est impossible de calculer séparément les mariages d'Indiens, parce que l'origine raciale de l'époux et de l'épouse n'est pas donnée sur le certificat de mariage.

Le terme "Indien", dans ces tableaux comprend aussi les métis dans chaque cas où l'entrée de l'origine raciale sur le certificat de naissance ou de décès permet cette classification.

Les statistiques des Indiens ne peuvent pas être considérées comme aussi complètes que celles de la population blanche. Pour ce qui est de l'exactitude de certaines phases particulières des statistiques, comme l'âge par exemple, il est probable que, dans plusieurs cas, les connaissances de ceux fournissant l'information étaient plutôt vagues. Pour ce qui est des causes de décès, telles que données, il faut aussi se rappeler qu'une forte proportion de ces causes sont données par des personnes autres que des médecins.

APPENDIX II

VITAL STATISTICS OF YUKON AND THE NORTHWEST TERRITORIES

APPENDICE II

STATISTIQUES VITALES DU YUKON ET DES TERRITOIRES DU NORD-OUEST

APPENDIX II

VITAL STATISTICS OF YUKON AND NORTHWEST TERRITORIES

The births, deaths and marriages reported for Yukon Territory and the Northwest Territories of Canada for the year 1941 are listed in the following tables. The statistics of these territories are presented separately from those of the provinces because the figures are not regarded as complete. Moreover, the population of the territories is so small that the omission of their births, deaths and marriages makes no material difference to the total for Canada. The inclusion of the territories with the remainder of Canada in the more detailed tables would also increase out of all proportion to the importance of the territories, the number of cases for which information under a given rubric was not available.

APPENDICE II

STATISTIQUES VITALES DU YUKON ET DES TERRITOIRES DU NORD-OUEST

Les naissances, décès et mariages constatés au Yukon et dans les Territoires du Nord-Ouest en 1941 sont énumérés dans les tableaux suivants. Les statistiques de ces territoires sont séparées de celles des provinces parce que les données sont incomplètes. De plus, la population des territoires est tellement infime que l'omission de leurs naissances, décès et mariages n'affecterait guère le total du Canada. L'inclusion de ces territoires avec les autres provinces du Canada dans les tableaux détaillés aurait comme conséquence d'augmenter, hors de toute proportion par rapport à l'importance des territoires, le nombre de cas non donnés sous une rubrique spécifique.

"There must be a reduction and more economical use of paper, envelopes and labour in respect of the free mailing list. This is the last issue of this publication you will receive unless you desire to have it continued, in which event you must advise this Department, and give the reason for such continuation. This does not apply to copies going to paid-up or exchange publications."

PREFACE

The present is the Twenty-second Annual Report on Vital Statistics to be issued by the Dominion Bureau of Statistics on data obtained under arrangement with Provincial Registration Departments. It is the seventeenth report covering all provinces.

The First, Second and Third Annual Reports contain a full account of the origin and purpose of the agreement between the Dominion and the provinces for the production of vital statistics, together with a sketch of the earlier development of these statistics in Canada. Registration of births, deaths and marriages is carried out by the provincial authorities, each province having passed an act making registration compulsory and prescribing that certain items of information be obtained on a uniform basis. Transcripts of the certificates are forwarded to the Dominion Bureau of Statistics and from these the Annual Reports for Canada are compiled. For the year 1942, in addition to the preparation of tables for the present volume, the Bureau of Statistics issued quarterly reports and a preliminary annual report, and supplied to all provinces the compilations required for their respective reports.

As in past years, the statistics of births, deaths and marriages among the Indian population of the provinces are included in the present report. They are also given separately in Appendix I. A summary of the vital statistics of Yukon and the Northwest Territories forms Appendix II.

The tables dealing with deaths by cause have been compiled in accordance with the Fifth Decennial Revision recommended by the International Commission for classification of Diseases and Causes of Death, at Paris, France, in October, 1938. Appendix III shows the relationship between the Intermediate International List of Causes of Death used in certain tables and the Detailed International List used in others. Appendix IV lists by provinces the number of deaths from all causes and from certain important causes according to the presence or absence of medical attendance. Appendix V presents the number of cases of certain notifiable diseases reported in the provinces of Canada during each month of 1942.

The present volume is issued without text, in this manner resembling previous Annual Reports commencing with the Ninth. In order, however, that the most essential figures for rates and comparisons in time shall be available to the reader, twenty-six tables containing such figures have been included in the report. They comprise the first section, under the title "Comparative and Analytical Tables". The Canada Year Book contains a textual summary and analysis for 1942 in comparison with previous years. Copies of this textual summary may be obtained upon application to the Vital Statistics Branch, Dominion Bureau of Statistics.

The collection of the data and the preparation of the report were undertaken by the Vital Statistics Branch in co-operation with the Provincial Vital Statistics Offices, under the direction of J. T. Marshall, Chief of the Vital Statistics Branch.

S. A. CUDMORE,
Dominion Statistician.

PRÉFACE

Le présent rapport annuel sur les Statistiques Vitales du Canada est le vingt-deuxième de la série que publie le Bureau Fédéral de la Statistique sur les données obtenues en vertu d'ententes avec les départements provinciaux. C'est le dix-septième rapport couvrant toutes les provinces du Canada.

Le premier, le deuxième et le troisième rapports annuels donnent un aperçu complet de l'origine et du but de cette entente entre le Dominion et les provinces pour la compilation des statistiques vitales et décrivent les progrès de ces statistiques au Canada. L'enregistrement des naissances, décès et mariages est fait par les autorités provinciales, chaque province ayant décrété l'enregistrement obligatoire suivant des formules tendant à établir certaines informations sur des bases uniformes. Des copies de ces actes sont envoyées au Bureau Fédéral de la Statistique et leur compilation sert de base au rapport annuel. En 1942 le Bureau Fédéral de la Statistique, outre la préparation de ces tableaux, a publié des bulletins trimestriels et un rapport annuel préliminaire. Il a de plus fourni à toutes les provinces les compilations dont elles avaient besoin pour leurs rapports respectifs.

Comme par le passé, on a fait entrer dans ce rapport les naissances, décès et mariages de la population indienne des provinces. Ils sont aussi donnés séparément dans l'appendice I. Un résumé des statistiques vitales du Yukon et des Territoires du Nord-Ouest forme l'appendice II.

Les tableaux portant sur les décès selon la cause ont été dressés conformément à la cinquième revision décennale faite à Paris, France, en octobre 1938 et recommandée par la Commission internationale pour la Classification des Décès et des Causes de Décès. L'appendice III montre la relation entre la liste internationale intermédiaire des causes de décès suivie dans certains tableaux et la liste internationale détaillée suivie dans d'autres. L'appendice IV donne par province le nombre de décès par toutes causes et par certaines causes importantes, avec ou sans l'assistance médicale. L'appendice V présente le nombre de cas de certaines maladies déclarables constatés dans les provinces canadiennes, chaque mois de 1942.

Le présent volume ne contient pas de texte, étant ainsi similaire aux rapports annuels antérieurs, commençant avec le neuvième rapport. Cependant, pour que le lecteur ait toujours les chiffres les plus essentiels des taux et des comparaisons de temps ces chiffres ont été incorporés en vingt-six tableaux formant la première section et appelés "Tableaux comparatifs et analytiques". L'Annuaire du Canada donne un résumé analytique de 1942 comparativement aux années précédentes. Des copies de ce résumé peuvent être obtenues sur demande à la Branche des Statistiques Vitales, Bureau Fédéral de la Statistique.

Le recueil des données ainsi que la préparation du présent rapport ont été faits à la Branche des Statistiques Vitales, en collaboration avec les bureaux provinciaux des statistiques vitales, sous la direction de J. T. Marshall, chef de la Branche des Statistiques Vitales.

La traduction a été faite par la Branche de Traduction du Bureau: Omer Chaput, chef.

S. A. CUDMORE,
Statisticien du Dominion.

COMPARATIVE AND ANALYTICAL TABLES

TABLEAUX COMPARATIFS ET ANALYTIQUES

NOTES

Yukon and the Northwest Territories with a population of 16,942 in 1941 are not included in the tables. Tables of births, deaths and marriages for these Territories are however given in Appendix II.

Figures for Registration Area as of 1921 or for Canada for the years 1921-25 inclusive comprise all the provinces except Quebec, which province entered the Registration Area in 1926.

Populations for 1921, 1931 and 1941 are census figures, those for Manitoba, Saskatchewan and Alberta for 1926 and 1936 are based on the census of the Prairie Provinces and remaining figures are estimates to the nearest thousand.

Rates have been standardized on the standard million of England and Wales, 1901.

Divisions in British Columbia are census divisions and the correspondence of their subdivisions with those in Census publications is as follows: $5_A = 5a, b, c, d$; $5_B = 5e, f$; $6_A = 6a, b, c.$; $6_B = 6d, e, f$; $8_A = 8a, b, c, d$; $8_B = 8e, f, g$; $9_A = 9a$; $9_B = 9b$; $9_C = 9c, d, e$; $9_D = 9f$; $10_A = 10a$; $10_B = 10b$; $10_C = 10c, d$.

"Urban" includes cities, towns and villages of 1,000 population and over, "Rural" the remaining parts. The classification of cities, towns and villages is according to the Census of 1941.

It should be noted that there is some variation in the comparison factor between figures for the years 1939 and 1940 and the figures for 1941 and 1942, due to the disturbance in distribution caused by changes in class and re-arrangement of titles recommended in the Fifth Revision of the International List of Causes of Death. Adjustments have been made to correct the demographic error as closely as possible.

Le Yukon et les Territoires du Nord-Ouest, dont la population s'élevait à 16,942 en 1941, sont exclus de ces tableaux. Les tableaux des naissances, des décès et des mariages pour ces territoires sont donnés dans l'appendice II.

Les chiffres du territoire d'enregistrement en 1921, ou pour le Canada les années 1921-25 inclusivement comprennent toutes les provinces sauf le Québec; cette province est entrée dans le territoire d'enregistrement en 1926.

Les chiffres de la population en 1921, 1931 et 1941 sont ceux du recensement; la population du Manitoba, de la Saskatchewan et de l'Alberta est celle du recensement des Provinces des Prairies de 1926 et 1936; les autres chiffres sont des estimations au millier le plus près.

Les taux ont été standardisés sur le million standard d'Angleterre et du Pays de Galles, 1901.

Les divisions en Colombie Britannique sont les divisions de recensement et leurs subdivisions correspondent comme suit aux subdivisions figurant dans les publications du recensement: $5_A = 5a, b, c, d$; $5_B = 5e, f$; $6_A = 6a, b, c$; $6_B = 6d, e, f$; $8_A = 8a, b, c, d$; $8_B = 8e, f, g$; $9_A = 9a$; $9_B = 9b$; $9_C = 9c, d, e$; $9_D = 9f$; $10_A = 10a$; $10_B = 10b$; $10_C = 10c, d$.

"Urbains" comprend cités, villes et villages ayant une population de 1,000 âmes et au-dessus, le reste est inclus avec "Ruraux". La classification des cités, villes et villages est selon le recensement de 1941.

A noter qu'il y a une certaine variation dans le facteur de comparaison entre les chiffres des années 1939 et 1940 et ceux de 1941 et 1942. Cette variation est due au remaniement de la distribution nécessité par les changements dans les catégories et le réarrangement des titres recommandés dans la Cinquième Revision de la Liste Internationale des Causes de Décès. Les ajustements ont été faits de façon à corriger le plus possible l'erreur démographique.
